DETAILED ACTION

1. Applicant's election without traverse of claims 1-41, 46-86, and 91-93 in the reply filed on May 2, 2007 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 4, the phrase "may be" renders the claim indefinite because it is unclear whether the limitation (s) following the phrase are part of the claimed invention. Appropriate correction is needed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if

Art Unit: 3623

the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 28, 46, 61-62, 69, 71, 79, 85, 91-92 are rejected under 35 USC 102(e) as being anticipated by D'Alessandro (U.S. Patent No. 6,556,974)

Regarding claims 1, 28, discloses obtaining over a computer network a structured response from an employee of the business (col. 5, lines 44-53), and determining the network routing of data from the structured response to business management based upon entries of the response (LAN for carrying the gathered responses from the employees) (col. 5, lines 44-59)

Claims 46, 61-62, 69, 71, and 85 are computer program product having computer readable code thereon for providing to business management a plan for implementing an employee suggestion of method claim 1; therefore claims 46, 61-62, 69, 71 are rejected under the same analysis relied upon of claim 1.

Claim 79 is a computer program product according to claim 46, further comprising: maintaining an employee suggestion log in memory of claim 34 above; therefore claim 79 is rejected under the same analysis relied upon of claim 34 above.

Claim 85 is a computer program product according to claim 46, further comprising maintaining an employee suggestion log in memory of claim 34 above; therefore claim 79 is rejected under the same analysis relied upon of claim 46 above.

Claims 91-92 recite all of the limitation of claim 1 above except for a set of templates from the employee creating. Note the rejection of claim 1 regarding the templates above.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-27, 29-41, 47-60, 63-70, 72-78, 80-84, 86, 93 are rejected under 35 U.S.C. 103(a) as being unpatentable over D'Alessandro (U.S. Patent No. 6,556,974).

Regarding claims 2-3, 5-10, 12-33, 35-41, 63-70, 72-78, 80-84, 86, 93, the claimed features (i.e. the templates) are standard practice of in the art of business management in order to have easy access to data. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to include such features in the system of D'Alessandro in order to have easy access to the data, thereby making easy to edit the data

Regarding claim 4, The method according to claim 3, wherein the type of proposal may be selected from **one of the group of** cost saving, revenue generation, quality improvement, safety improvement, customer service improvement, policy change and advertising or corporate slogan (col. 9, lines 31-36).

As per claim 11, D'Alessandro does not teach wherein access to financial data is controlled through an employee's log-in for the computer network. However, wherein access to financial data is controlled through an employee's log-in for the computer network is old and well known in the art in order to provide unauthorized access to the

Art Unit: 3623

financial data.

Regarding claim 34, D'Aleesandro does not explicitly disclose maintaining an employee suggestion log in memory associated with the processor. However it is old and well known in the art to maintain an employee suggestion log in memory in order to provide easy access to the suggestion data. It would have been obvious to a person of ordinary skill in the art to modify the disclosures of D'Alessandro to include this well known teachings in order to provide easy access to the data.

Claims 47-55, 57-62, are computer program having computer codes thereon for providing to business management a plan for implementing the steps of method claims 2-3, 5-6, 7-10, 12, 13-33, 35-36, 38-41 above; therefore claims 47-55, and 57-62 are rejected under the same rationale relied upon of claims 2-3, 5-6, 7-10, 12, 13-33, 35-36, 38-41 above.

Claims 56 is a computer program product wherein access to financial data is controlled through an employee's log-in for the computer network of method claim 11 above; therefore claim 56 is rejected under the same analysis relied upon of claim 11 above.
